Household Survey Data Quality Analysis Tool

Training overview

June 2017

Household Surveys provide data on education participation, attainment & completion, and literacy

- Include: Multiple Indicator Cluster Surveys (MICS), and Demographic and Health Surveys (DHS)
- Data from sampled households, often disaggregated by: sex, age, location, wealth; usually not by disability
- Data used by the UIS (school attendance ratios and other indicators) and others to complement administrative data

Household Survey DQA Tool includes:

- Data inventory
- Institutional environment
- Statistical processes
- Statistical outputs

Household Survey DQA Tool and scoring:

- Identify what is working well, what can be strengthened
- Scores for individual components or across all components
- Not designed for cross-country comparisons

Workshop Agenda:

1. Overview of the HH Survey DQA tool
2. Review of the tool together, using a sample survey for illustration
3. Discussion of how to improve the tool
