SDG Monitoring and Trends

This country profile presents the data available to monitor SDG 4 global indicators. Data points for China are available for indicators 4.1, Education 2030 FFA, 4.2, 4.b, 1.a, and 4.a. The trends are calculated here as the difference between the mean annual growth rate before and after 2015, whenever at least three data points are available in each period. An up green arrow \bigcirc , indicates that there was a positive change from the first period to the second. A down red arrow \bigcirc indicates if the change was negative. Differences of +/- 5% between the two periods are considered stable and marked with a right orange arrow \bigcirc . For out-of-school rates, a squared red arrow \bigcirc points down when the situation is worsening (when rates go up) and a green squared arrow \bigcirc points up when the situation is improving (when rates go down). The gray area and line in the miniplot show the average for Eastern and South-Eastern Asia (SDG) in the period.

Target 1.a - By 2030, ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions
